Allowable Subject Matter

1. Claims 1-16 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a television receiving apparatus having an automatic discrimination auto-search function for two kinds of channel plans. The prior art fails to teach or fairly suggest a television receiving apparatus comprising *second channel number counting means* for memorizing an error data off a center frequency together with a channel number, if it is determined by *first channel number counting means* that the channel frequency of the broadcast station is outside of a fixed frequency range from the center frequency, for all stations that are judged to be present, and making a comparison between error data associated with one channel number and error data associated with another channel number to determine whether or not a difference between the error data associated with one channel number and the error data associated with another channel number is within the fixed frequency range, classifies, into groups, the error data associated with one channel number in accordance with the difference between the error data associated with one channel number and the error data associated with another channel number, and further adds and counts up a number of error data contained within a largest of the groups to a station present channel number of the second channel plan.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
